Daily Timing	9:30 am - 5:30 pm (30-minute lunch; tea breaks within scheduled time)
Mode	Instructor-led, concept-first workshops and connected hands-on labs
Trainer	Courseware Team

Learning Outcomes

On completion of this course, learners will be able to:

- LO1: Explain agentic marketing architecture and define goals, tools, memory, approval gates, and operational guardrails for a marketing agent.
- LO2: Build a repeatable trend-discovery workflow that evaluates freshness, evidence, brand fit, and risk before recommending an opportunity.
- LO3: Produce an aligned multi-platform content and multimedia kit that preserves audience intent, brand voice, factual accuracy, and creative rights.
- LO4: Design an AI-assisted campaign blueprint, experiment plan, content calendar, and controlled launch workflow tied to objectives and KPIs.
- LO5: Calculate and interpret social performance metrics, analyse synthetic audience feedback, and turn findings into evidence-linked recommendations.
- LO6: Diagnose paid-media performance, propose bounded experiments, and design a human-governed optimization loop with stop conditions and audit evidence.

Learning Reinforcement

- Every topic is followed by hands-on labs that learners complete on their own machine.
- Each lab ends with a 'Test it' verification step so learners can confirm their own progress.
- The trainer circulates during lab time to give individual feedback and unblock learners.
- Each topic closes with a recap mapped back to the course learning outcomes.
